Description

0 100 200 300
Lead Time Difference

The average lead time for non-wire/cable/conductor data is 77.56 days. The standard deviation is 62.5339613852394. The highest lead time is 300.0 days and the lowest lead time is 34.0 days.

Based on the above data, it can be concluded that the average lead time for wire is 48.82 days. The standard deviation is 74.83 days, which means that the majority of lead times fall within 74.83 days of the average. The highest lead time is 364 days and the lowest lead time is 8 days.
